— PROFILE

About

Fullstack developer with strong backend expertise in TypeScript, Node.js, and NestJS, focused on building reliable, scalable, and maintainable web applications.

My core strength is backend development: designing APIs, implementing business logic, building integrations, and shaping system architecture. At the same time, I work confidently on the frontend with Vue.js and can deliver features end-to-end, from concept to production.

In recent roles, I have contributed to enterprise integrations, internal automation platforms, SaaS products, and high-load commercial systems. My experience includes building products from scratch, supporting public-facing solutions with 100,000+ installs, and delivering tailored solutions for enterprise clients.

I care about clean architecture, pragmatic engineering, and software that solves real business problems.

— WHAT I WORK WITH

Experience

Rocket.red

Jan 2024 — Present **Now**

Frontend / Fullstack Developer

Junior → Senior within the company

- Built SPAs and internal services for Enterprise clients
- Designed core modules and contributed to system architecture
- Delivered 2 high-load Enterprise projects (\$30k+ budget each)
- Maintained and extended custom interfaces and modules inside AmoCRM
- Mentored junior developers; led code review culture

TypeScript Vue.js Node.js Vite Docker RabbitMQ Redis

Freelance & personal projects

Sep 2021 — Dec 2023

Frontend / Fullstack Developer

Web apps, SPAs, admin panels

- Built web applications and landing pages for businesses
- Designed and implemented admin interfaces and SPAs
- Delivered API integrations and responsive layouts

TypeScript Vue.js Node.js NestJS SCSS

CodeKids

Aug 2021 — Present **Now**

Founder & Programming Instructor

Programming school for kids

- Founded and grew a programming school from scratch
- Designed educational programs and managed a team of instructors
- Built a custom CRM system for the school (Vue + Node.js)

Vue.js Node.js Operations Leadership

Selected projects

ServiceDesk

SPA LEAD

Ticketing & helpdesk SPA. Designed component architecture, state management, REST integration.

Vue 3 TypeScript REST

➤ Client ➤ Backend

pkm-balans.ru

FULLSTACK

Commercial public-facing site. Layout, integrations, admin tooling.

Vue Node.js

➤ pkm-balans.ru

imperiya.tvoe.taxi

FULLSTACK

Taxi-aggregator portal: driver onboarding, dispatch flows, billing.

Vue NestJS

➤ imperiya.tvoe.taxi

CodeKids Platform

ARCHITECT & AUTHOR

Custom platform for a programming school: students, schedules, payments, instructor workflows.

Vue Node.js NestJS PostgreSQL

Education

Zlatoust Industrial College, P.P. Anosov

Information Systems & Programming

Vocational degree, with honors

+ Continuous self-education through documentation, OSS, and LLM-assisted research

+ Daily Claude Code / Codex workflow integrated into engineering practice
